

Keeping you one
step ahead.

**Do you suffer
from persistent
pain or mobility
problems?**

Orthotics assist in
mobility; correcting
and preventing
deformity when
worn.

Mac Orthotics is a specialised orthotic service offering clinical care and home consultations to address all your orthotic needs. We provide a range of orthotic services for both children and adults.

It is our primary mission to seek out, design and deliver the most innovative products to exceed your expectations and allow you to be all you can be.

Orthotic Services

We're committed to providing a fast and approachable service.

We will work with you to find the best orthotic solution.

Insoles

We offer a wide range of both stock and custom insoles, following an assessment we will advise on the best design of insole for you, taking into consideration your preferred style of footwear.

Ankle Foot Orthosis

Drop foot or muscle weakness is the most common use for an AFO, they are also used to block painful movement at the ankle or correct deformity when being worn in more complex cases.

Knee Bracing

Knee problems can be very unsettling, whether it be ligament problems, arthritis, pain or weakness, we offer a wide selection of knee bracing to suit your needs.

Kids Footwear

Sometimes little feet need a little bit more support - we have lots of great styles to offer.

Adult Footwear

Wide feet, bunions, narrow heels, swelling, amongst other problems can make finding shoes in shops a challenge. We have a wide selection of orthopaedic footwear to match your style and your budget.

Shoe Raise

Discreet shoe raises for both inside and outside your shoes.

Wrist & Hand Supports

Additional support for busy hands – we have a wide variety of wrist and hand supports available.

Back and Hernia Supports

For treating painful back conditions and hernias, these are usually wrap around styles and can be both 'off the shelf' and custom made. We can also address more complex and lower levels of hernia.
